Subject: RE: request of City Well information.

Both wells were sampled for PCE twice this year so far. We are monitoring every 3 months. Well 6 was sampled on 1/13/16 and 4/13/16 and both results were ND for PCE. Well 7 was sampled on 2/10/16 and 4/13/16 and both results were ND for PCE.

Below I have listed well information for both of the wells and I've also attached the well data from Department of Public Health for both wells. Let me know if you need anything else.

Let me know if you need anything else.

Subject: request of City Well information.

Hi Melissa,

As per our discussion, I am interested in the latest flow rates, water levels, screen intervals and PCE concentration data for City Well 6, City Well 7 and City Well 1. This information will help in our assessment of the Halford's and Elwood's PCE plumes. Thank you.

Regards,

Jim
